AMD Media Converter + AMD H.264 MMAL Media Codecs = Realtime High Quality Video Converting. Features of AMD Media Converter: Supports most video/movie formats and has over 30 preset for almost all video/movie formats. Easy to use wizard-style user interface makes it super simple to convert video to HD video and recording to DVD without modifying source file. You can edit the video/movie parameters in the video stream when converting or converting video files. It has two connection ports so you can easily connect it to LAN and USB. And it supports advanced features such as frameskip, deinterlacing, noise reduction, HDR, and other various setting for HD video so that it's more superior to other "convert video to HD" software. AMD H.264 MMAL Media Codecs: MMAL Media Codecs are also included as standard codecs. Features of AMD H.264 MMAL Media Codecs: This set of media codecs supports both decoding and encoding of H.264/AVC video and provides frame rate variable (frame rate for the decoding and field rate for the encoding), detailed time for the frame and time for the field. In fact, the video and audio quality will be greatly improved by using the H.264 media codecs along with AMD Media Converter. AMD Media Codec Packages also offers an easy to use wizard-style user interface so you can easily convert video to HD video and recording to DVD without modifying the source file AMD Media Codec Packages also has a preview function. So you can preview the converted video stream before you convert. In addition, you can convert to either NTSC or PAL video after preview, and provide motion vector for either HD or SD resolution. All of the above-mentioned features can be configured as you like, so you can get the best quality without modification. All you have to do is install the package, install AMD H.264 MMAL Media Codecs, and run AMD Media Converter. When you convert video, you can select one or more preset configurations to get the best quality video out. So you won't have to find your own combinations of presets for your favorite videos.
